Courses: B.A., B.Sc., B.Com., M.A. (Hindi, Sociology, Education, Home Science), M.Sc (Botany, Chemistry, Mathematics), M.Com., B.Ed., M.Ed., B.El.Ed., D.El.Ed.

About the Seminar

The Indian knowledge tradition represents a vast and diverse intellectual heritage rooted in ancient texts, philosophies, sciences, and practices such as Ayurveda, Yoga, mathematics, astronomy, linguistics, and ethics. In the contemporary era, modern technology offers powerful tools to preserve, analyze, and disseminate this traditional knowledge on a global scale. Digital archives, artificial intelligence, data analytics, and interdisciplinary research create new possibilities for integrating traditional wisdom with modern scientific approaches, especially in fields like education, healthcare, sustainability, and wellness. However, several challenges remain, including loss of original context, language barriers, lack of standardization, issues of intellectual property, and the risk of commercialization without ethical grounding. Balancing authenticity with innovation is a critical concern. Addressing these challenges requires a thoughtful and inclusive framework that respects cultural values while embracing technological advancement. When harmonized effectively, Indian knowledge traditions and modern technology together can contribute meaningfully to global knowledge systems and sustainable development.

Call for Papers:

"Indian knowledge tradition and modern technology: challenges and possibilities "

Mode of Paper Presentation

Full paper will be presented online and offline (Hybrid Mode) both on the choice of paper Presenter.

Sub Themes

The papers will be welcomed in Hindi/English language on the following related sub- themes:

1. Digitization and Preservation of Ancient Indian Texts
2. Integration of Indian Knowledge Systems with Artificial Intelligence
3. Balancing Cultural Authenticity and Technological Innovation
4. Language, Translation, and Interpretation Challenges in Indian Knowledge
